

Unified Communication

Work from Anywhere
Work with MobeX

Your Unified Communication Suite

MobeX is a comprehensive suite of communication tools designed to optimise your business workflow, enhance collaboration, and boost productivity, regardless of where your team is located.

Utilising MobeX enables you to manage your business communications effortlessly and effectively. Experience uninterrupted communication with the ability to make and receive telephone calls over a secure, encrypted internet connection. By simply linking your business phone extension to a MobeX licence, you can begin reaping the benefits of digital calling.

Accessible on both web and mobile platforms, MobeX ensures you have all your calls and communication information at your fingertips, no matter where you are. With an internet connection, you can stay connected and never miss a call again.

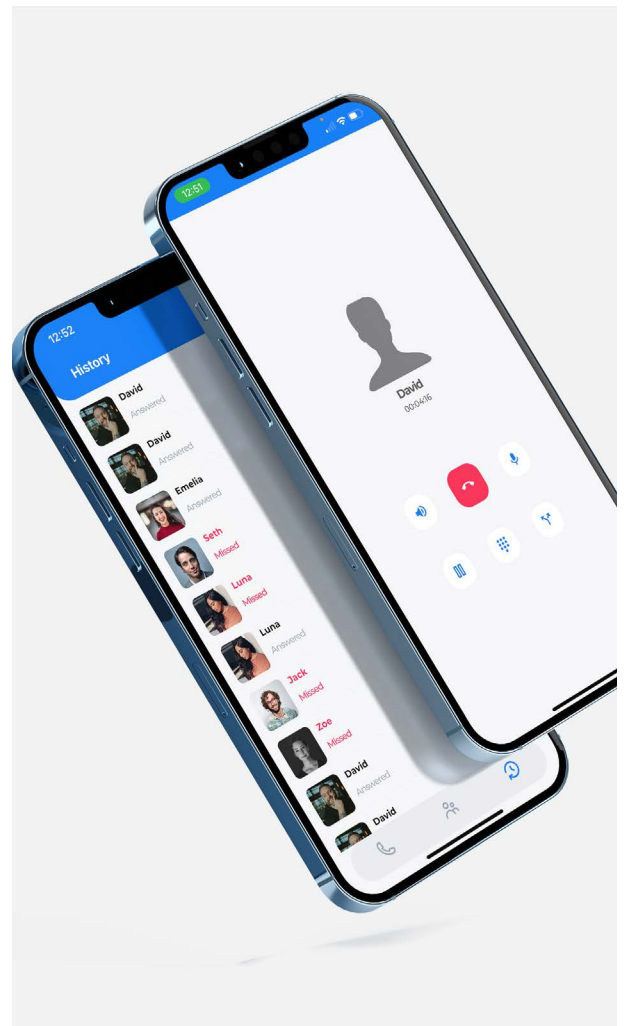

MobeX[®] web

Transform your PC or laptop into a powerful communication hub with MobeX Web. This versatile application provides high-quality voice and video calls, instant messaging, presence status, and screen-sharing capabilities. Enjoy easy navigation through an intuitive interface, engage in interactive responses with features like BLF buttons, and access your cloud and local phonebooks. Stay connected from any location with an internet connection. MobeX Web is compatible with popular web browsers like Google Chrome and Microsoft Edge.

MobeX[®]+ mobile

call. This mobile softphone application for Android and iOS devices keeps you connected to your business extension, allowing you to make and receive calls, access contacts, view your call history and utilise features like call recording from anywhere. MobeX+ offers a user-friendly interface and provides a clear view of colleagues and their availability while on the move.

Simplify your calling process and boost efficiency with MobeX UC. This application enhances calling efficiency by allowing users to dial numbers copied to their clipboard, saving valuable time and reducing errors associated with manual input. Alternatively, you can make outbound calls by entering the number into the user-friendly desktop dial pad. MobeX UC streamlines both inbound and outbound calls, featuring automatic pop-ups that display caller names and numbers.

Connecting MobeX directly into Microsoft Teams provides the ultimate integration by uniting all communication tools in one easy-to-use platform. Utilising MobeX 4Teams allows you to make outbound calls, review call history, and access your MobeX cloud phonebook directory, all within the familiar Teams environment. This integration streamlines collaboration for users relying on Microsoft Teams, offering smooth navigation and access to essential communication tools.

 **MobeX[®]** busylight

Enhance workplace productivity and minimise interruptions with the MobeX Busylight. This USB-connected device provides a visual indication of your availability status, reducing unnecessary disruptions and improving focus. With customisable LED colours and audio ringtones, the Busylight ensures you never miss a call while promoting a more productive work environment. Its interactive responses alert you to incoming calls and messages effectively.

 **MobeX[®]** touch

Experience the future of deskphones with MobeX Touch. This smart deskphone combines the power of the MobeX softphone with a dedicated hardware device. Featuring a 10.9-inch HD touchscreen, the MobeX Touch offers intuitive call management, video conferencing, access to business applications from the Google Play Store, and customisable features to suit your specific needs. Enjoy clear calls, video meetings, easy navigation, and interactive responses, all on a dedicated device.

**Grow your business
with the ultimate set
of communication
features**

MobeX Click2Dial is a Chrome extension that enables effortless outbound calling by launching calls with a single click from any web page, including web-based CRM platforms. MobeX Click2Dial saves you valuable time on every call, allowing you to dial faster and work more efficiently.

Business Comms - Simplified

MobeX integrates various communication methods, including voice and video calls, instant messaging, and presence status into a single platform. This unification aims to streamline communication workflows, reduce the need to switch between different applications and improve overall collaboration within a business.

Communications made Affordable

MobeX is designed to be a cost-effective communication solution, leveraging WebRTC technology to reduce reliance on traditional phone lines and hardware. This can significantly lower infrastructure and maintenance costs, making it an ideal choice for hybrid working environments. Additionally, a MobeX licence can be used alongside a handset, giving you flexible options for handling calls.

Supercharge Your Workflow

The MobeX suite of tools aims to enhance productivity by providing efficient communication and collaboration features. Features like click-to-dial, instant messaging, screen sharing, and integrated calling within Microsoft Teams are designed to optimise workflows, reduce errors, and facilitate quick communication.

Get Started in Seconds

The MobeX Suite is designed with ease of use and straightforward setups in mind. Our step-by-step online user guides ensure users can start using the suite with minimal setup time and without complex configurations.

Adaptive Communication

As an ever-evolving communications solution, the MobeX Suite offers flexible communication with diverse applications, integrations, customisable interfaces, and app store access. Regular updates demonstrate our commitment to adapting to changing demands.

Make it your own

Personalise your MobeX experience by adding your own profile image and setting customisable statuses to make colleagues aware of your availability. MobeX also accommodates users with dark mode for ease on eyes and various colour modes for those with visual impairments.

Elevate your calling

Feature	Description
Busy Lamp Fields	Easily view the statuses of colleagues with various presence indicators.
