

About WhateX

WhateX is a business WhatsApp solutions provider, enabling brands and teams to connect with consumers over WhatsApp.

Consumers have moved on from email and the modern lifestyle means people are harder to connect with.

Utilising the power of WhatsApp API, WhateX opens up WhatsApp as an official communications channel for your sales and service teams.

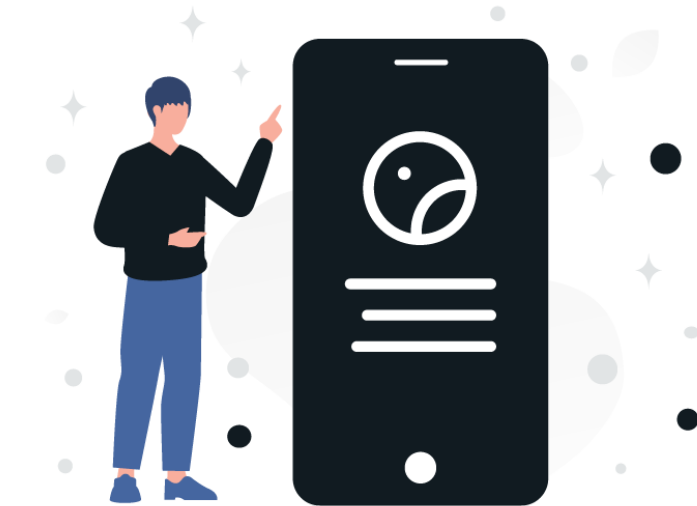

Why WhatsApp?

Messaging is the preferred method of communication in our personal lives

WhatsApp is the most popular messaging app in over 100 countries and boasts over 2 billion active users.

The average WhatsApp user opens WhatsApp 23 times per day

Personal email accounts are drowned in spam and junk

75% of callers hang up at voicemail

Open and read rates are 7 times better in WhatsApp than in email

A Shared Team or Private Inbox with Browser Based Cloud Software and an App in Google & Apple Stores

The Tech Explained

Consumers using WhatsApp
as normal

WhatsApp API via Gupshup
enabling consumers & businesses
to message on WhatsApp

WhateX software hosted on AWS
in Europe

Business using the WhateX app
and cloud software to message
consumers

How WhateX Can Help You

Your current Issues with using WhatsApp without WhateX

- ✗ Customer conversations are being conducted on personal WhatsApp accounts by your staff
- ✗ The business has no visibility of private conversations on staff's personal WhatsApp meaning the messages cannot be viewed, tracked or reported on as well as not being captured in the CRM
- ✗ Valuable data and information regarding key relationships sit within the staff's private WhatsApp, which is a business risk
- ✗ Client data cannot be deleted if requested
- ✗ Data is being processed outside of GDPR regulations, and in many cases, in breach of WhatsApp terms & conditions

The Solution

Using a WhatsApp Business Solution (API) guarantees that your important and confidential information is stored in a centralised location, remaining within the business and fully compliant with GDPR regulations.

How WhateX Can Help You

The communication Gap

- ✗ Notifications for personal email accounts are often disabled, meaning open rates are poor (sub 20%). WhatsApp has a 98% open & read rate — 7 times greater than that of email
- ✗ B2C's report that over 70% of their outbound calls don't get answered
- ✗ Important updates can be missed & scheduling the next stage can become extremely frustrating
- ✗ Failing to communicate effectively can lead to reducing the customer experience and the value of the brand

The Solution

By leveraging the WhatsApp Business Solution (API), you can effectively reach out to your customers through WhatsApp, enhancing communication efficiency with increased read and open rates, prompt responses, and an overall improved customer experience.

Collaboration

- Shared team inboxes for WhatsApp
- Tailored Access Controls for work-related conversations, enabling assignment to individuals and teams, as well as tagging for targeted marketing broadcasts
- Support for various media types, allowing the sharing of documents, images, barcodes, URLs, and videos
- Comprehensive Analytics and Reporting Capabilities

Integration

- Streamline communication by logging conversations into your CRM for enhanced visibility
- Empower customers to initiate chats via your website, social media, or QR codes
- Enhance customer engagement by integrating with your phone system to automatically send WhatsApp messages and reduce call abandonment rates

Automation

- Utilise bots to improve the prequalification of sales leads and enquiries
- Automatically direct queries to the appropriate team for prompt customer responses
- Effortlessly handle after-hours requests
- Automatically respond to third-party email leads and forms through WhatsApp

Encryption & Compliance

- GDPR Compliant WhatsApp
- Adhere to WhatsApp's Personal & Business Policies
- MiFID II Compliance
- End to End Encryption
- Phishing resilient
